

FORMAT A: INTER-DEPARTMENTAL REQUISITION LETTER

Date: 15 / 09 / 2026

From,

Mohammed Nihad P C (Roll No: JEC24CC044)**Sreehari K** (Roll No: JEC24CC055)

S5, Department of Cyber Security

Jyothi Engineering College, Cheruthuruthy

To,

The Head of the Department,

Department of Mechanical Engineering,

Jyothi Engineering College, Cheruthuruthy.

Through,

The Head of the Department (Dr. Geethu Mary George),

Department of Cyber Security, Jyothi Engineering College.

Subject: Requisition for Vernier Caliper & Machine Shop Drilling Access for Project Testbed**Respected Sir / Madam,**

As part of our project work titled "VibeGuard: Machine Vibration & Industrial Predictive Maintenance Testbed" (S5 Cyber Security), we are currently fabricating the physical motor-sensor testing rig on an acrylic baseplate.

To ensure accurate fabrication and avoid assembly errors during mounting, we respectfully request permission to utilize the following facilities in the Department of Mechanical Engineering:

1. Issue of a Vernier Caliper (0.01 mm resolution) to measure motor D-shaft dimensions, fastener tolerances, and sensor PCB mounting pitches.
2. Access to the Workshop Bench / Pillar Drill Press facility (with 2.5 mm and 3.2 mm HSS drill bits) to drill precision mounting holes in our acrylic plate.

We assure you that all workshop safety guidelines will be strictly followed, tools will be handled with utmost care, and instruments will be safely returned to the Tool Crib immediately upon completion.

Kindly grant us permission to access the requested measuring tools and drilling facility.

Thank you.

Yours sincerely,

Mohammed Nihad P C

Jyothi Engineering College, Cheruthuruthy

To,

The Head of the Department,

Dr. Geethu Mary George,

Department of Cyber Security,

Jyothi Engineering College, Cheruthuruthy.

Subject: Request for Official Endorsement / Forwarding for Mechanical Workshop Access**Respected Madam,**

As part of our project work on "VibeGuard: Machine Vibration & Industrial Predictive Maintenance Testbed", we are currently setting up the physical hardware testbed rig. For this, we require precision measurements using a Vernier Caliper and need to drill mounting holes into our acrylic baseplate using the pillar drill press in the Mechanical Workshop.

The Department of Mechanical Engineering has indicated that inter-departmental equipment loan and workshop access require an official recommendation and forwarding letter from our Head of Department.

We kindly request you to endorse and forward our attached requisition letter to the Head of the Department, Mechanical Engineering, so that we may obtain the measuring instruments and complete our fabrication work.

We assure you that all workshop activities will be carried out safely in adherence to institutional guidelines, and without disruption to our scheduled academic classes.

Thank you.

Yours respectfully,

Mohammed Nihad P C

FORMAT C: MECHANICAL WORKSHOP TOOL & FACILITY ISSUE SLIP

Date: 15 / 09 / 2026

Project Title: VibeGuard (Vibration Monitoring Testbed)	Student 1: Mohammed Nihad P C (JEC24CC044)
Department: Cyber Security (Semester S5)	Student 2: Sreehari K (JEC24CC055)
Faculty Guide: Project Coordinator / Mentor	Contact: Student Project Team Workbench

ITEMS & WORKSHOP MACHINERY REQUESTED:

Sl	Item / Facility Description	Required Specification	Purpose in Assembly
1	Digital / Vernier Caliper	0–150 mm, 0.01 mm resolution	Measure N20 D-shaft & hole pitches
2	Pillar / Bench Drill Press	Fixed vertical quill press	Drill 90° holes in acrylic baseplate
3	HSS Drill Bit (Pilot)	2.5 mm High Speed Steel	Pilot centering to prevent drill walk
4	HSS Drill Bit (Clearance)	3.2 mm High Speed Steel	Standard M3 bolt clearance through-hole
5	Machine Vise & Wood Backing	Plywood backing block	Clamp acrylic without cracking sheet
6	Hand Deburring / Chamfer Tool	90° countersink or scraper	Lightly deburr holes to prevent cracks

STUDENT UNDERTAKING:

We undertake to abide by all mechanical workshop safety regulations, wear appropriate protective eye gear, operate machinery strictly under technician guidance, and return all checked-out tools in sound working condition.
